

**Foster's Refillery**  
**Marketing and Sustainable Operations Intern**

**Business overview:**

Foster's Refillery (FR) is an online refill-delivery service. We're similar to the milkman model, but for home essential products. We deliver eco-friendly cleaning supplies, and personal hygiene products to the customer's doors. When FR bulk containers are empty, clients leave them outside for us, we pick them up, clean, sanitize, and refill them— our closed-loop system eliminates plastic waste. Many of the products we carry are locally made, and FR does bike deliveries within Salt Lake City proper.

**Time Requirements:**

- 135 hour commitment
- Monday, Wednesday, and Friday mornings
- About 8-10 hours a week-- schedule can be somewhat flexible

**To Apply:**

- Send resume & cover letter to [info@fostersrefillery.com](mailto:info@fostersrefillery.com).

**Work overview:**

We are a small start up, so your contribution will be vital to operations. That also means, however, that the work can be grueling, labor intensive and not the most glamorous.

A large part of intern daily responsibilities involves fulfilling orders. That includes preparing orders, managing the inventory and warehouse space, and doing deliveries. We also constantly need content for our social media. Interns will be tasked with creating quality content, and involved in marketing campaigns.

This is a great opportunity for someone who is eager to cultivate their marketing and entrepreneurial skill sets with a business focused on sustainability. We need someone who is hardworking, creative and trustworthy.
