BikeUtah

GIS Internship Opportunity

General Info -

Bike Utah envisions a state where complete networks of bike lanes, paths, and trails create livable, healthy communities—allowing everyone to ride, regardless of age, ability, race, or income. We collaborate with government agencies, businesses, and the public to develop active transportation plans, educate thousands of children and adults, advocate for safer streets, and enhance quality of life through better biking infrastructure.

Internship Details

- *Location:* Remote or Hybrid
- *Duration:* One semester (with an option to extend)
- *Compensation:* Unpaid

Preferred Qualifications -

We have a multitude of projects available, all surrounding active transportation for AT plans, and analysis. We prefer that students are proficient in ArcGIS and the ESRI suite of applications.

GIS Skills
- Proficiency in ArcGIS Pro, ArcGIS Online, and the ESRI suite of applications
- Remote sensing capabilities
- Spatial analysis & data visualization
- Data management & organization
- Basic cartographic principles

General Skills
- Problem-solving mindset
- Self-starter with the ability to work independently
- Knowledge of active transportation (*preferred but not required*)

How to Apply -

Send a email to ally@bikeutah.org include -
- A brief cover letter (1 - 2 paragraphs) stating your interest
- A example of some of your past GIS experience (i.e maps, reports..)
