

Bird strike project application Dec 2019

Send this, along with your unofficial transcript (see directions here: <https://registrar.utah.edu/transcripts/transcript-unofficial.php> ) to Dr. Brown at [Barbara.brown@fcs.utah.edu](mailto:Barbara.brown@fcs.utah.edu) 801-581-7111

The project can develop a set of research skills that you can add to your vita. You can collaborate on a SCIF grant proposal, conduct field data collection, upload photo documentation to UBox and iNaturalist, and other possible applications depending on student interest (e.g., persuasive outreach, proposal of bird-friendly building standards, investigation of new hotspots, understanding the roles birds play in human lives and sustainability challenges). I am seeking students who are reliable and interested in using science to help with sustainability. Good candidates will also understand the importance of reliable data collection, and be available to meet weekly to revise and submit the Sustainability Campus Initiative Fund grant application in February.

Are you interested in this opportunity for:

FCS undergraduate research hours

Environmental Studies undergraduate research hours (note: ENVST application is due soon see <https://envst.utah.edu/forms/undergraduate-research-application.php> )

Work study. Please note you already have to be enrolled in work-study to be eligible. If work-study students are interested, I will create a work-study job ad. Apply here <http://utah.peopleadmin.com/postings/101595> PRN10191N

Other: please specify:

How many hours per week do you want? (Note for independent study students, 9 hours per week is expected for students who receive 3 credit hours, 6 hours for 2 credits, and 3 hours for 1 credit)

What times during the week would you have available for meetings and/or field tests of reliability of observing bird strikes?

Please write up to one page to describe your interests and qualifications for the project below.
