

**POSITION:** Development Intern

**DEPARTMENT:** Real Estate

**REPORTS TO:** Sr. Vice President, LandCo

**LOCATION:** Salt Lake City

Growing renewable energy company in Salt Lake City, UT seeks a highly motivated Development Intern to join the Real Estate team. The successful candidate will have an aptitude for spatial analysis and a passion for renewable energy. This is an entry level position, but a relevant field of study and internship experience are preferred. Proficiency in ArcGIS is a requirement. Part-time during the academic year and full time in the summer is preferred. \$10-15 per hour (depending on experience) with an immediate start.

**Principal Duties and Responsibilities:**

- Preform GIS-driven suitability analysis for origination campaigns and due diligence on acquisition targets
- Produce accurate and meaningful maps with a high visual impact
- Build upon and maintain existing GIS library, reach out to organizations and jurisdictions to fill data holes
- Maintain and update sPower property holdings pipeline in Google Earth Pro
- Assist Real Estate team with property acquisitions and closings
- Provide general support to the Real Estate team

**Desired Skills and Experience:**

- BA/BS in process (or Graduate work) with an excellent academic record, GIS emphasis is preferred
- Proficiency in the MS Office Suite and ArcGIS is required
- Database experience is a plus

**Application:**

- Submit resume, cover letter, and references to James Leabman at [JLeabman@sPower.com](mailto:JLeabman@sPower.com).

**About sPower:**

Headquartered in Salt Lake City, with offices in San Francisco and New York City, sPower (Sustainable Power Group) is an owner and operator of utility and distributed electrical generation systems across the US. sPower is actively buying solar PV assets in any stage of development, as well as seeking to acquire operating solar projects in North America. sPower is a portfolio company of Fir Tree Partners, a leading global investment fund with more than 20 years of investing history and approximately \$14BB of capital under management. sPower's three-prong operating strategy consists of a balance between 1) developing early stage projects; 2) acquiring and then running late-stage sustainable energy projects; and 3) procuring fully operational assets. sPower's unprecedented growth (acquisition of Tioga Energy's operating assets; merger with Fir Tree Partner-backed developer of solar projects, Silverado Power; and acquisition of Bosch North American operating assets) has secured its position as a leader in the renewable energy industry. sPower uniquely possesses the leadership, vision, ability and resources to plan, fund, purchase, build, own and operate complex energy installations across a variety of segments.
